Each count is taken against the 367 conventional hits; counts are not nested
All genes analysed
27,809
Conventional paired test (BH $q < 0.05$)
367
Stable under patient resampling ($\pi \geq 0.8$)
11
Stable under the preservation-aware model
1
Stable after host correction (preservation-aware)
3 (2 among the 367)
Robust (all criteria)
